EXPERIENCE

SoftNursery Ltd.

📅 Nov 2023 – Present

Junior Software Engineer

Employed as a Junior Software Engineer, specializing in Next.js within an e-commerce project. Extensive experience with Next.js, including NextIntl and Three.js libraries. Primarily focused on frontend development while also contributing to backend tasks.

Utronics Ltd.

📅 Nov 2021 – Feb 2022

Intern as a web developer

I have contributed to diverse projects, including an e-commerce platform and a cricket-related project, gaining valuable experience in varied domains and enhancing my skill set.

PROJECTS

Real Time Chat Application

📦 MERN Stack, Socket.io, Redux, Material-UI

🌐 chatvista.vercel.app

The project involved the development of user registration, authentication, and access control systems to ensure secure user interactions. Additionally, real-time messaging functionalities were integrated to facilitate seamless communication and interactive media sharing within the platform.

Demographic Visualization

📦 NextJS, MongoDB, Leaflet, Recharts, Sendgrid

🌐 demographybd.vercel.app

This undergraduate project is a part of the Electrical and Electronic Engineering curriculum at the University of Rajshahi. It focuses on forecasting Bangladesh's population based on user inputs.

Portfolio Website

📦 NextJS, Firebase, React-Bootstrap

🌐 arabin.vercel.app

Developed a minimalist and sophisticated portfolio website, featuring a user-friendly interface. Integrated the Sendgrid API to facilitate the reception of visitor's emails.

Result of EEE App

📦 React Native, Firebase, Redux

🌐 [Drive Link](#)

This App serves as a comprehensive repository for all results of my batch within the EEE Department at the University of Rajshahi. Additionally, it is seamlessly integrated with the Sendgrid API of my portfolio for enhanced functionality.
